Forecast for Sunday 07 May 2023

Weather: A cloudy start to Sunday with some mist and fog in places. Slowly brightening up through the morning, bringing spells of warm sunshine during the afternoon. The low chance of a light shower, but generally staying dry into the evening. Cloud thickening from the west later with some patchy rain and drizzle possible overnight.

Chance of cloud-free hill tops above 600m: 10% increasing to 80% during the afternoon, decreasing to 20% by later evening.

Low cloud and visibility: Low cloud, mist and fog will cover most hills during the start of Sunday, but will lift to have bases around 300-400m by mid-morning. Cloud will continue to lift and break up into the afternoon, occasionally covering the tops of hills above 700m. Poor to very poor visibility during the morning. Visibility improving to good or very good into the afternoon, although perhaps becoming moderate in any showers.

Meteorologist's View

Poor visibilities during the morning will mean good navigational skills will be required at height, especially if traversing any featureless terrain. However, through the afternoon, UV will be moderate in any prolonged sunshine, so extra sun protection may be required.

Recent rainfall: measured at Neuadd: altitude 353m

14:00 on Fri 05 May 2023	12.8mm	12.8mm	12.8mm

Forecast for Monday 08 May 2023

Weather: Cloud will continue to thicken with patchy rain and drizzle turning into more persistent rain during the morning, this possibly heavy for a time. Remaining cloudy, but rain gradually easing and clearing eastwards by late afternoon, leaving a more showery end to the day.

Maximum wind: Southwesterly, 20-30 mph, gusts up to 40 mph during the afternoon.

Chance of cloud-free hill tops above 600m: 20% increasing to 40% by late afternoon.

Low cloud and visibility: Cloud bases generally 400-500m during the morning, though perhaps dropping to 200-300m in the heavy rain. Cloud will slowly lift through the afternoon, but will still cover hill tops above 600-700m. Generally moderate to poor visibility, becoming very poor in heavy precipitation. Visibility improving slightly as rain eases later.

Temperature: **Valleys:** Plus 10 Celsius, rising to plus 15 Celsius.
At 600m: Plus 7 Celsius, rising to plus 11 Celsius.
Freezing level: Above all summits.
